We do not host video content. We have no affiliation with any of the Add-on providers. All content that this unit links to is publicly available on the internet. You can Google everything that is available on this unit. The XBMC program is a publicly available media player and all the Add-ons found in the unit are from people who spent the time to find these links and have organized them for you in the Add-ons' repositories. Some links may not be functional or are 'dead' links (just like in Google) or may have slow internet speeds.
